SUMMARY

Results-driven software developer with extensive experience in building robust and scalable applications. Proficient in a diverse range of technologies including **C++, MERN stack, Java, Spring Boot**, and **Next.js**. Adept at developing end-to-end solutions, from backend systems to dynamic front-end interfaces, with a strong focus on performance, security, and user experience. Experienced in working with both small and large teams across multiple projects and companies. Able to work independently of remote locations or in office environments as needed by the company.

PROJECTS

KryptoPulse

Developed a real-time cryptocurrency tracking platform.
- **Technologies Used:** Built with the MERN stack for dynamic and responsive web applications.
- **Real-Time Data:** Integrated cryptocurrency APIs for live price updates and market analysis.
- **User Dashboard:** Designed an intuitive interface for portfolio management and performance tracking.
- **Interactive Visuals:** Implemented interactive charts for detailed market insights.

NewsPulse

Developed a modern news aggregation platform.
- **Technologies Used:** Built with React for a dynamic and responsive user experience.
- **Real-Time Updates:** Integrated news APIs to deliver live updates and trending headlines.
- **Category-Based Navigation:** Implemented category-based browsing to easily explore news across various topics.
- **User-Friendly Interface:** Designed an intuitive and engaging interface for seamless article navigation.

RealDocs

Developed a real-time document collaboration platform.
- **Technologies Used:** Built with Next.js for a fast, scalable web application.
- **Live Collaboration:** Enabled simultaneous editing and real-time updates for multiple users.
- **Team Management:** Implemented features for team-based document organization and management.
- **Comments & Feedback:** Integrated in-document commenting and feedback tools to streamline collaboration.

SKILLS

C++ · Java · SpringBoot · MERN · Next.js
